SIGNIFICANTLY VIEWED STATIONS FOR SATELLITE TV
Submitted by John R. Metzger

In looking at the list of channels identified as significantly viewed for Mifflin County, Pennsylvania, I was very surprised at how incomplete the list seemed to be. You list the following channels as significantly viewed:

WGAL, 8, Lancaster, PA
WJAC-TV, 6, Johnstown, PA
WWCP, 8, Johnstown, PA
WTAJ-TV, 10, Altoona, PA

In my immediate locality just outside Burnham which is served by Atlantic Broadband Cable the following channels are offered:

WGAL-8 Lancaster PA
WTAJ-10 Altoona, PA
WLYH-15 Lebanon, PA
WHP-21 Harrisburg, PA
WHTM-27 Harrisburg, PA
WITF-33 Harrisburg, PA (PBS)
WPMT-43 York, PA
WVIA-44 Scranton, PA (PBS)

Adelphia Cable which serves the most populated area of the county (including Lewistown and Burnham) offers:

WPSX-3 Clearfield, PA (PBS)
WGAL-8 Lancaster, PA
WWCP-8 Johnstown, PA
WTAJ-10 Altoona, PA
WLYH-15 Lebanon, PA
WHP-21 Harrisburg, PA
WHTM-27 Harrisburg, PA
WKBS-47 Altoona, PA

Other stations offered on Mifflin County cable systems include:

WJAC-6 Johnstown
WNEP-16 Scranton/Wilkes-Barre
WYOU-22 Scranton
WBRE-28 Wilkes-Barre
WOLF-56 Scranton

As you can see the list that is proposed in the significantly viewed list certainly does not seem to represent the stations being seen by Mifflin County cable viewers. Cable viewers represent most of the TV watchers here antennas are completely inadequate in this county. It is my hope that the FCC will present a list of significantly viewed channels which more adequately represents what Mifflin County Cable subscribers are permitted to view.
